

AVAILABILITY LIST

EFFECTIVE: 01/11/2019

Thank you for your interest in Surface Studio (Pty) Ltd. We look forward to the privilege to being of service to you and your company.

Please find herein our availability list for your perusal and consideration.

We are extremely committed to keeping stock of all products mentioned in this document, but on occasion significant quantities of our stocks are consumed on larger un-forecasted projects which might affect our ability to service your needs. We, therefore, urge you to contact us for availability.

Please feel free to contact us: +27 (0) 87 149 1585 or enquiries@surfacestudio.co.za

FINISH INDEX

CB	CARBON ANTI-FINGERPRINT	A distinctive surface treatment on it's decorative layer gives Carbon a silky and smooth tactile user experience. It's high resistance to micro-scratches and abrasion helps avoiding surface distortion and gives a lasting impression. In the event of a light scratch the surface can be cleaned with a soft cloth to get it back to its original form. CARBON Surface is extremely matt and near to zero gloss which provides its visual sophistication via its intensive light absorbance and homogeneous colour dispersion.
FG	FINEGRAIN	Woodgrain is essential for all aesthetic purposes. The grain direction whether be it straight, or spiral, or interlocked, or wavy, or irregular, refers to the orientation of the wood-cell fibres. This finish gives the warmth and feel of real wood.
GL	GLOSS	Gloss is an optical property which indicates how well a surface reflects. Infito™ Gloss Laminate surfaces are very smooth with a Gloss level of 112~115 degrees (@ 600mm) and repels dust, dirt and fingerprints that can be wiped clean.
HGD	HIGH DEFINITION GLOSS	A Micro Abrasive Scratch Resistant Gloss Laminate is ideal for all high gloss surfaces. Because of its unique inherent properties, the laminate can retain its' colour and gloss without any major distortion over a period of time.
LE	LEATHER	The Leather Surface affords the visual appeal of an authentic leather hide which presents with pores and wrinkles. It has a uniform grain pattern which is very durable and flexible. When touched, gives a tactile and warm feeling of a natural material. Recommended for solid colours.
LG	LOGLARE	The surface has a timeless beauty. A well accepted surface for counter tops, vanity counters and furniture as this finish inherently also has good scratch resistance.
MA	MATT	The surface comparatively appears smooth with a flat finish with no sheen or reflective properties.
ME	METALLIC	This finish gives texture and modernity of metal to the surface. An elegant solution for those who want to use metal in their designs. For vertical applications only.
MN	MOON	A rigid surface that resembles the flowing of molten lava lending a stone-like feel to the touch. A non-uniform three- dimensional effect enhances the tactile experience.
MO	MONTANA	The Laminate yields the ultimate look and character to any woodgrain décor. The structure allows us to experience the product not only visually but also through touch.
NW	NATURAL WOOD	Bring the feel of a forest into your space - the feel of trees, logs, moss and bushes.
ST	STONE	The Stone finish has the beauty and feel of natural stone.
US	ULTRA SMOOTH	A surface with luxuriously soft feel and has no light reflection. The colours will appear very prominent with a unique deep appearance.
WE	WEAVE	The Laminate surface appears very similar to the fabric – rugged, tightly woven in which the weft passes under the warp threads. A refreshing option for any accent design pieces or prominent walls.
